Monthly Newsletter

CareMaster Updates

New Funding Limits

CareMaster now supports multiple funding limits with different start and end dates, types of funding and NDIA types.

The NDIS bulk export will also account for plans which start or end mid month to minimise errors with the upload.

The new funding limits also have new alerts when you are within 10% or over their scheduled or checked funding limits.

The new alerts are in the Data -> Alert Display section and they will also pop up with a message when created or modifying supports.

Dual Profiles

Users are now able to have dual profiles.

This has been added to better suit users that require more than 1 type of access and features.

Now users can be added/alterd as:

- Admin & worker
- Admin & coordinator
- Coordinator & worker

Goals

You are now able to add goals to a Participant/Clients profile. This will help track what needs to be done for a participant and what they are set out to achieve.

Helpdesk Portal

There is now a little question mark  on the top right next to "log out" that leads to a CareMaster Support page where you can search for information, ask a question and/or report any bugs/issues.

Coming Soon

Xero API

This addition to CareMaster will allow users to export invoices and other reports into Xero compatible files for easier upload.

Advertise/Broadcast

Advertise/Broadcast supports to workers, this feature will allow you to notify workers that a support is available by either SMS or E-mail. They will be able to accept the support by tapping or clicking the link in the notification.

Service Agreement Generation

This feature will allow you to generate a Service Agreement straight from CareMaster.
